Safety Data Sheet (SDS)

	Effective Date: June 10, 202
1. IDENTIFICATION OF THE	E SUBSTANCE/PREPARATION AND COMPANY/UNDERTAKING
	: MOLYGREEN PRO S SP GF-6 0W-20
	: 4 stroke gasoline engine oil.
	: Other than those above.
	: CAP Style Co.,Ltd.
Manufacturen/oupplier	1-11-5 Oomorikita, Oota-ku, Tokyo, 143-0016 Japan
Tolonhono/Eax	: Refer to end of this document.
	: Refer to end of this document. (Japanese office hours only)
Number	Quality Assurance Division
SDS Code	: 419251
2. HAZARDS IDENTIFICATI	
	OT HAZARDOUS
GHS Label Elements	
	a symbol
	o symbol
	o signal word
	ot classified under GHS criteria.
GHS Precautionary Statem	
	precautionary phrases.
	precautionary phrases.
	precautionary phrases.
	p precautionary phrases.
Unclassified Hazard : Ple	ease see Section 4 - 8 before use for Prevention/Response/Storage/Disposal.
	sed oil may contain harmful impurities.
3. COMPOSITION/INFORM	ATION ON INGREDIENTS
Substance or Mixture	: Mixture
Chemical Description	: Lubricating oil.
Component Information	: Lubricant base oil 80-90%
	Additives 10-20%
Chemical Formula	: Not possible to define.
CAS registry number	: Trade secret
Additional Information	: If product contained highly refined mineral oil, it contains <3% DMSO-extract,
Additional information	
Dellutent Delegas and Tree	according to IP346.
Pollutant Release and Tran	
Register (PRTR) Law	the second state of the se
Industrial Safety and Healt	
Law	Delivery of Documents: Molybdenum and its compounds <1%
Poisonous and Deleterious	s : Not applicable
Substance Control Law	
Classification of compone	
according to GHS	Alkaryl amine/Aquatic Chronic 4/H413/<3%
The specific chemical identit	ties and percentages of composition have been withheld as trade secrets.
4. FIRST AID MEASURES	
General Information	: Not expected to be a health hazard when used under normal conditions.
Inhalation	: Remove casualty to fresh air and keep at rest in a position comfortable for breathing.
	Cover with blanket to keep warm and rest in a quiet surrounding. Seek immediate
	medical advice and attention.
Skin Contact	: Wash skin with large amount of water using soap.
Eye Contact	: Rinse cautiously with clean water for several minutes. Remove contact lenses, if
	present and easy to do, and continue rinsing. After rinsing for a minimum of 15
	minutes, seek medical advice and attention.
Ingention	
	: Without inducing vomiting, call a doctor for treatment. If mouth has been dirtied, clean
Ingestion	with water.
-	f and f a
Most Important	: If swallowed, may irritate mucous membrane of stomach and induce vomiting.
Most Important Symptoms/Effects, Acute	Inhalation if mist may cause feeling ill. Skin contact and eye contact may cause
Most Important Symptoms/Effects, Acute & Delayed	Inhalation if mist may cause feeling ill. Skin contact and eye contact may cause irritation.
Most Important Symptoms/Effects, Acute	Inhalation if mist may cause feeling ill. Skin contact and eye contact may cause
Most Important Symptoms/Effects, Acute & Delayed Immediate Medical	Inhalation if mist may cause feeling ill. Skin contact and eye contact may cause irritation.
Most Important Symptoms/Effects, Acute & Delayed	Inhalation if mist may cause feeling ill. Skin contact and eye contact may cause irritation.

5. FIRE FIGHTING MEASURES

Clear fire area of all non-emergency personnel.		
Suitable Extinguishing	: Concentrated strong liquid in mist and powder forms, carbon dioxide and foam. Use	
Media	powder and carbon dioxide may be used small fires only. Effective to use foam to	

	shutdown the air in a large fires.
Unsuitable Extinguishing Media	: Do not use water in a jet.
Specific Hazards Arising from Chemicals	: Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide. Unidentified organic and inorganic compounds
Fire fighting instructions	: Water the surrounding equipment to cool them down. Cordon off the affected place and its vicinity to all, except the concerned parties.
Protective Equipment & Precautions for Fighters	: Ensure to wear protective equipment and approach from windward.

6. ACCIDENTAL RELEASE MEASURES

0. ACCIDENTAL RELEASE MEASURES		
Avoid contact with spilled or released material. For guidance on selection of personal protective equipment see Section 8 of this SDS. See Section 13 for information on disposal. Observe the relevant local and international		
regulations.		
Personal Precautions,	: Avoid contact with skin and eyes. Prepare suitable equipment and materials.	
Protective Equipment and		
Emergency Procedures		
Environmental Precautions	: Use appropriate containment to avoid environmental contamination. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers. In event of entering in the sea, extend oil fences to prevent from spreading, and sop up with absorbent materials. Use chemicals and/or detergents, they must satisfy technical standards as set by the Ministry of Land, Infrastructure and	
	Transport / Ministry of the Environment.	
Methods and Material for Containment and Clean Up	: Promptly remove all ignition sources and stop leakages. In a small leakage, absorb and recover by use of soil, sand, sawdust and waste clothes. In a large leakage, cordon off the danger zone, prevent from entering and enclose it with sand bank and	
	stop outflow. Cover liquid surface with foam, and recover liquid into containers.	
Additional Advice	: Local authorities should be advised if significant spillages cannot be contained.	
7. HANDLING AND STORAG HANDLING	BE	
Technical Measures	: In handling this material over the allocated volume, ensure approval to meet requires of the laws. Keep away from heat, sparks, open flames, hot objects. No smoking. Take measures against static discharge. Ensure to wear clothing and shoes made of conductive materials. When fixing or processing machine, it carries out after removing dangerous objects completely. NEVER suck up (siphoning) this material by mouth. Wear suitable protect equipment if skin or eye contact may cause. Seal containers hermetically without handling in violent such as falling, dropping, or jolting.	
Ventilation Precautions	: see Section 8	
Precautions for Safe Handling	: Use under normal temperature. Prevent from mixing water and impurity. Avoid contact with halogens, strong acids, alkali and oxidizing materials.	

STRAGE	
Conditions for Safe	: Keep containers tightly closed and in a cool, well-ventilated place away from direct
Storage	sunlight. It is recommended to lock up storage area. Use properly labelled and closeable containers. Avoid heat, sparks, open flame and static accumulation.
Technical Measures	: All electrical appliances shall be explosion-proof types, and they all must be earthed.
Precautions for Safe	: Avoid contact and storage in same place with halogens, strong acids, alkali and
Stroage	oxidizing materials.
Recommended Materials	
	rupture. Do not weld, heat up, drill or cut containers. May ignite the residue and cause explosion.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

If the American Conference of Governmental Industrial Hygienists (ACGIH) value is provided on this document, it is provided for information only. Equipment Seal or install ventilations for mist occurs. Install eye shower and body shower near working site. **Standard Concentration** : Not specified Control **OSHA**, Permissible : 5mg/m³ (as Oil mist, mineral) **Exposure Limits (PEL) Occupational Exposure** : Japan Society for Occupational Health(2012)⁽¹⁾ Data not available. Limits ACGIH(2012) TWA[Inhalable fraction.]⁽²⁾ Data not available. : Skin protection not ordinarily required beyond standard issue work clothes. **Protective Equipment** : No respiratory protection is ordinarily required under normal conditions of use. Use **Respiratory Protection** appropriate equipment in response to the circumstances. **Hand Protection** : Use oil-proof protective hand gloves under prolonged or repeated skin contact.

Eye Protection
Skin and Body
Protection
Appropriate Sanitary
Measures:

Wear safety glasses or full face shield if splashes are likely to occur.Use oil-proof/long sleeved clothing under prolonged usage.

: Remove immediately all contaminated clothing. Contaminated clothing must be laundered before reuse.

9. PHYSICAL AND CHEMIC	AL PROPERTIES	
Physical state		: Liquid at room temperature.
Colour		: Amber.
Odour		: Slightly odour.
Odour threshold		: Data not available.
рH		: Not applicable.
Pour point		: <-40°C
Initial Boiling Point		: Expected >250°C
Flash point		: ≥ 200°C (COC)
Evaporation rate		: Data not available.
Flammability (solid, gas)		: Not applicable.
Upper / lower Flammability	or Explosion limits	: Typical 1 - 7 %(V) (based on mineral oil)
Vapour pressure		: Data not available.
Vapour density		: Data not available. Expected >1
Density		: Approx. 0.84g/cm ³ (15°C)
Solubility		: Water: Negligible.
n-octanol/water partition c	oefficient (log Pow)	: Data not available.
Auto-ignition temperature		: Data not available. Expected >320°C
Decomposition Temperatu		: Data not available.
Decomposition remperatu	lie	
10. STABILITY AND REACT		1. 192
Chemical Stability	: Stable under norma	
Hazardous Reactivity	: Avoid contact with s	strong oxidizing agent.
Conditions to Avoid	: Avoid contact with h	nalogens, strong acids, alkalis, and oxidizing materials.
Incompatible Materials	: Data not available.	
Hazardous Decomposition	: Hazardous decomp	osition products are not expected to form during normal storage.
Products		carbon monoxide, sulfurous acid gas etc. during combustion.

11 TOXICOLOGICAL INFO	RMATION	
11. TOXICOLOGICAL INFO		asad on data on the components and the toxicology of similar
11. TOXICOLOGICAL INFO Basis for Assessment	Information given is b	ased on data on the components and the toxicology of similar
	Information given is ba	
	Information given is b products. Unless indicated othe	rwise, the data presented is representative of the main component
	Information given is b products. Unless indicated othe of a whole product, ra	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components
Basis for Assessment	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-o	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3.
	Information given is b products. Unless indicated othe of a whole product, ra	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$
Basis for Assessment	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-o	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$
Basis for Assessment	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-on 1 Oral 2 Dermal	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$ Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rabit^{(3)}$
Basis for Assessment	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-o 1 Oral 2 Dermal 3 Inhalation(Vapour)	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$ Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rabbit^{(3)}$ Data not available
Basis for Assessment Acute Toxicity	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-o 1 Oral 2 Dermal 3 Inhalation(Vapour) 4 Inhalation(Mist)	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$ Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rabbit^{(3)}$ Data not available Low toxicity: $LC_{50} > 5 \text{ mg/l}$, 4h, $Rat^{(3)}$
Basis for Assessment	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-of 1 Oral 2 Dermal 3 Inhalation(Vapour) 4 Inhalation(Mist) : Not classified as a s	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$ Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rabbit^{(3)}$ Data not available Low toxicity: $LC_{50} > 5 \text{ mg/l}$, 4h, $Rat^{(3)}$ skin irritation (rabbit test). ⁽³⁾ Prolonged/repeated contact may cause
Basis for Assessment Acute Toxicity Skin Corrosion/Irritation	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-of 1 Oral 2 Dermal 3 Inhalation(Vapour) 4 Inhalation(Mist) : Not classified as a s defatting of the skin	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$ Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rabbit^{(3)}$ Data not available Low toxicity: $LC_{50} > 5 \text{ mg/l}$, 4h, $Rat^{(3)}$ skin irritation (rabbit test). ⁽³⁾ Prolonged/repeated contact may cause which can lead to dermatitis.
Basis for Assessment Acute Toxicity Skin Corrosion/Irritation Serious Eye	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-of 1 Oral 2 Dermal 3 Inhalation(Vapour) 4 Inhalation(Mist) : Not classified as a s defatting of the skin	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$ Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rabbit^{(3)}$ Data not available Low toxicity: $LC_{50} > 5 \text{ mg/l}$, 4h, $Rat^{(3)}$ skin irritation (rabbit test). ⁽³⁾ Prolonged/repeated contact may cause
Basis for Assessment Acute Toxicity Skin Corrosion/Irritation Serious Eye Damage/Irritation	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-of 1 Oral 2 Dermal 3 Inhalation(Vapour) 4 Inhalation(Mist) : Not classified as a se defatting of the skin : Not classified as an	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$ Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rabbit^{(3)}$ Data not available Low toxicity: $LC_{50} > 5 \text{ mg/l}$, 4h, $Rat^{(3)}$ skin irritation (rabbit test). ⁽³⁾ Prolonged/repeated contact may cause which can lead to dermatitis. eye irritation (rabbit test). ⁽³⁾ Capable of slightly irritating.
Basis for Assessment Acute Toxicity Skin Corrosion/Irritation Serious Eye Damage/Irritation Respiratory or Skin	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-of 1 Oral 2 Dermal 3 Inhalation(Vapour) 4 Inhalation(Mist) : Not classified as a se defatting of the skin : Not classified as an : No data available co	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$ Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rabbit^{(3)}$ Data not available Low toxicity: $LC_{50} > 5 \text{ mg/l}$, 4h, $Rat^{(3)}$ skin irritation (rabbit test). ⁽³⁾ Prolonged/repeated contact may cause which can lead to dermatitis. eye irritation (rabbit test). ⁽³⁾ Capable of slightly irritating.
Basis for Assessment Acute Toxicity Skin Corrosion/Irritation Serious Eye Damage/Irritation Respiratory or Skin Sensitisation	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-of 1 Oral 2 Dermal 3 Inhalation(Vapour) 4 Inhalation(Mist) : Not classified as a se defatting of the skin : Not classified as an : No data available of Not expected to be	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$ Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rabbit^{(3)}$ Data not available Low toxicity: $LC_{50} > 5 \text{ mg/l}$, 4h, $Rat^{(3)}$ skin irritation (rabbit test). ⁽³⁾ Prolonged/repeated contact may cause which can lead to dermatitis. eye irritation (rabbit test). ⁽³⁾ Capable of slightly irritating.
Basis for Assessment Acute Toxicity Skin Corrosion/Irritation Serious Eye Damage/Irritation Respiratory or Skin Sensitisation Germ Cell Mutagenicity	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-of 1 Oral 2 Dermal 3 Inhalation(Vapour) 4 Inhalation(Mist) : Not classified as a se defatting of the skin : Not classified as an : No data available of Not expected to be : Not considered a m	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$ Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rabbit^{(3)}$ Data not available Low toxicity: $LC_{50} > 5 \text{ mg/l}$, 4h, $Rat^{(3)}$ skin irritation (rabbit test). ⁽³⁾ Prolonged/repeated contact may cause which can lead to dermatitis. eye irritation (rabbit test). ⁽³⁾ Capable of slightly irritating.
Basis for Assessment Acute Toxicity Skin Corrosion/Irritation Serious Eye Damage/Irritation Respiratory or Skin Sensitisation	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-of 1 Oral 2 Dermal 3 Inhalation(Vapour) 4 Inhalation(Mist) : Not classified as a se defatting of the skin : Not classified as an : Not considered a m	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$ Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rabbit^{(3)}$ Data not available Low toxicity: $LC_{50} > 5 \text{ mg/l}$, 4h, $Rat^{(3)}$ skin irritation (rabbit test). ⁽³⁾ Prolonged/repeated contact may cause which can lead to dermatitis. eye irritation (rabbit test). ⁽³⁾ Capable of slightly irritating. oncerning respiratory sensitisation. a skin sensitiser. ⁽³⁾ utagenic hazard. ⁽³⁾ of known to be associated with carcinogenic effects. ⁽³⁾
Basis for Assessment Acute Toxicity Skin Corrosion/Irritation Serious Eye Damage/Irritation Respiratory or Skin Sensitisation Germ Cell Mutagenicity	Information given is be products. Unless indicated othe of a whole product, ra contained above cut-of 1 Oral 2 Dermal 3 Inhalation(Vapour) 4 Inhalation(Mist) : Not classified as a se defatting of the skin : Not classified as an : Not expected to be : Not expected to be : Not expected to be : Not expected to be	rwise, the data presented is representative of the main component ther than for individual component(s). Individual components off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rat^{(3)}$ Expected to be of low toxicity: $LD_{50} > 5000 \text{ mg/kg}$, $Rabbit^{(3)}$ Data not available Low toxicity: $LC_{50} > 5 \text{ mg/l}$, 4h, $Rat^{(3)}$ skin irritation (rabbit test). ⁽³⁾ Prolonged/repeated contact may cause which can lead to dermatitis. eye irritation (rabbit test). ⁽³⁾ Capable of slightly irritating. oncerning respiratory sensitisation. a skin sensitiser. ⁽³⁾ utagenic hazard. ⁽³⁾ a hazard. ⁽³⁾ a hazard. ⁽³⁾ a hazard. ⁽³⁾

12. ECOLOGICAL INFORMATION

Basis for Assessment Ecotoxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products.

	Unless indicated otherwise, the data presented is representative of the main component of a whole product, rather than for individual component(s). Individual components
Caution Toxicity	contained above cut-off value is described on Section 3. : Poorly soluble mixture. May cause physical fouling of aquatic organisms. : Fish Practically non toxic: LC/LL/EL/IL50 >100mg/L ⁽³⁾ : Aquatic Invertebrates Practically non toxic: LC/LL/EL/IL50 >100mg/L ⁽³⁾ : Algae Practically non toxic: LC/LL/EL/IL50 >100mg/L ⁽³⁾
Acute Aquatic Toxicity	: Microorganisms Practically non toxic: LC/LL/EL/IL50 >100mg/L ⁽³⁾ : Not expected to be a hazard.
Chronic Aquatic Toxicity	: Not expected to be a hazard.
Mobility	 Lubricating oil components have estimated log Koc >3, indicating these components are likely to be adsorbed onto soil and sediment and are not likely to leach to ground water.
Persistence/degradability	 Expected to be not readily biodegradable. Major constituents are expected to be inherently biodegradable.
Bioaccumulative Potential	: Not expected to be a hazard. It may contains components with the potential to bioaccumulate. ⁽³⁾
Hazardous to ozone layer	: Not classified because this product not contained substances listed on Montreal Protocol and Ozone Layer Protection Law.
13. DISPOSAL CONSIDERA	TIONS
Material Disposal	 Waste disposal yourself or entrust the industrial waste treatment company who obtained the prefectural governor's permission or municipal corporation. Disposal should be in accordance with applicable regional, national, and local laws and regulations. Do not dispose into the environment, in drains or in water courses.
	3 For landfill disposal, destroy by fire and confirm cinders agreed to Waste Disposal Law.
	4 In event of burning this material, ensure to carryout work in safe place with guards in position, and select a method that would not cause any harm or damage to others during combustion or explosion.
Container Disposal	: Purify and recycle or performs suitable disposal in accordance with the standard of related laws and regulations. Disposal with remove content completely.
14. TRANSPORT INFORMA	

Internatio	onal Restriction	
UN Cla	ss, Shipping	: Not Dangerous Goods.
Name		
UN Nur	mber	: Not applicable.
Marine	Pollutant	: Yes. (contain oil.)
Domestic	Restriction	: Since domestic laws and regulations shown below are applicable, containers and
		transportation methods shall be required to follow each and every regulation.
Land	Fire Service Law	: Dangerous goods. Group 4 (flammable liquid), Class 4 petroleum, Danger grade III
	Container:	If product classified as dangerous goods, use containers (other than tanker, tank car
		and tank truck) for transportation usage, shall meet the Clause 2, Notice Attachment
		3, concerning dangerous materials.
Sea		: Ship Safety Law: Not Dangerous Goods.
Air		: Civil Aeronautics Act: Not Dangerous Goods.
Specific s	safety measures	 Caution: Not classified as flammable but will burn.
and cond	litions for	2 Transport remarkably with containers may not cause friction or agitation.
transport	ation	3 Display signage on vehicle and provide with fire fighting equipment, if and when
		required to transport more than the specified quantity. Total piled height of vehicle
		shall be less than 3 meters.
		4 Consolidation of this material with dangerous goods belonging to the 1st and 6th
		Classification is prohibited.
		5 Abide by other laws and regulations that are applicable.
	ATORY INFORM	ATION
	onal Information	
	S/ELINCS (EC)	: All components listed or polymer exempt.
TSCA (: All components listed or in compliance.
METI (· All components listed or in compliance

METI (JAPAN)	: All components listed or in compliance.
Domestic Information	
Fire Service Law	: Dangerous goods. Group 4 (flammable liquid), Class 4 petroleum, Danger grade III
Pollutant Release and	: Not applicable
Transfer Register (PRTR)	
Law	

Industrial Safety and Health Law Poisonous and Deleterious Substance Control Law	 Labeling(Delivery of Documents): Mineral oil 10-20% Delivery of Documents: Molybdenum and its compounds <1% Not applicable
Marine Pollution Protection	: Waste Oil Regulation.
Sewage Control Law Water Pollution Prevention Law	: Mineral Oil Disposal Regulation. (5mg/L) : Oil Disposal Regulation. (5mg/L)
Waste Disposal and Public Cleaning Law	: Industrial Waste Regulation.

 Ministry of Health, Labour and Welfare, "Label and SDS information for GHS model"

Safety Data Sheet (SDS) about hazardous chemical is provided for a entrepreneur as reference information for safety handling. Refer to this document and perform suitable handling. Nothing in this document shall reduce the user's responsibility to satisfy itself as to the suitability, accuracy, reliability, and completeness of such information for its particular use. There is no warranty against intellectual property infringement. The information contained in this document is based upon data believed to be reliable through our supply chain at the time. So, we could not guarantee all about the contents. This document is based on JIS Z7253:2012/JIS Z 7252:2014, and is not a guarantee of safety. Contents of SDS updated periodically. SDS compliance is required as a rule to all business enterprises engaged in transaction of chemicals (including products containing them) with other businesses. Retailer/ Wholesaler must provide newest SDS to customers.
